

## DAILY ASSESSMENT FORMAT

<b>Date:</b>	<b>06/07/2020</b>	<b>Name:</b>	<b>Prajwal Kamagethi Chakravarti P L</b>
<b>Course:</b>	<b>Matlab From Mathworld</b>	<b>USN:</b>	<b>4AL17EC073</b>
<b>Topic:</b>	<ol style="list-style-type: none"> <li>1. Course Overview</li> <li>2. Commands</li> <li>3. MATLAB Desktop and Editor</li> <li>4. Vectors and Matrices</li> <li>5. MIT APP inventor</li> <li>6. CISCO IOT</li> </ol>	<b>Semester &amp; Section:</b>	<b>6 &amp; B</b>
<b>Github Repository:</b>	<b><a href="https://github.com/alvas-education-foundation/Prajwal-Kamagethi.git">https://github.com/alvas-education-foundation/Prajwal-Kamagethi.git</a></b>		

## SESSION DETAILS

### Session images

**MATLAB is an interactive program for numerical computation and data visualization. You can enter a command by typing it at the MATLAB prompt '>>' on the Command Window.**

**In this section, we will provide lists of commonly used general MATLAB commands.**

### **Commands for Managing a Session**

**MATLAB provides various commands for managing a session. The following table provides all such commands –**

Command	Purpose
---------	---------

<b>clc</b>	<b>Clears command window.</b>
<b>clear</b>	<b>Removes variables from memory.</b>
<b>exist</b>	<b>Checks for existence of file or variable.</b>
<b>global</b>	<b>Declares variables to be global.</b>
<b>help</b>	<b>Searches for a help topic.</b>
<b>lookfor</b>	<b>Searches help entries for a keyword.</b>
<b>quit</b>	<b>Stops MATLAB.</b>
<b>who</b>	<b>Lists current variables.</b>
<b>whos</b>	<b>Lists current variables (long display).</b>

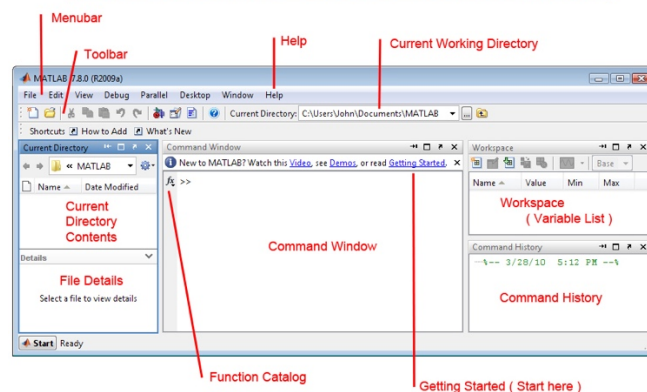

### Commands for Working with the System

MATLAB provides various useful commands for working with the system, like saving the current work in the workspace as a file and loading the file later.

It also provides various commands for other system-related activities like, displaying date, listing files in the directory, displaying current directory, etc.

- MATLAB Desktop and Editor

### The MATLAB Work Environment

## Matrices and Arrays

*MATLAB* is an abbreviation for "matrix laboratory." While other programming languages mostly work with numbers one at a time, *MATLAB*® is designed to operate primarily on whole matrices and arrays.

All *MATLAB* variables are multidimensional *arrays*, no matter what type of data. A *matrix* is a two-dimensional array often used for linear algebra.

- **MIT app inventor**
